admin

## 2. Copy and Paste into **API Name** and **API Key**

The screenshot displays the 'APIs' management interface. On the left, the 'Edit API' form is shown with tabs for 'General', 'IP Addresses', and 'Session'. The 'General' tab is active, showing fields for 'API Name' (admin) and 'API Key' (a long alphanumeric string). A 'Generate' button is located below the API Key field. The 'Status' dropdown is set to 'Enabled'. On the right, the 'Available Options' sidebar lists various configuration options: 'Domain Name' (www.example.com), 'Application' (Opencart Amazon Store), 'Installation Services' (Do It Yourself), 'Location' (London UK Data Center 1), 'Package' (Free 50 SKUs / Month), 'API\_Name' (admin), and 'API\_Key' (a long alphanumeric string). A large orange 'ADD TO CART' button is at the bottom of the sidebar. Two red arrows originate from the 'API Key' field in the 'Edit API' form and point to the 'API\_Key' field in the 'Available Options' sidebar, indicating the transfer of the API key value.
